

# UNI@FRESH

*For brighter mornings!*

*Healthy indoor air  
– the best for your family*

**Did you know that excess levels of carbon dioxide cause nausea, headaches, tiredness - and also reduce your ability to concentrate?**

Less than adequate levels of ventilation mean that concentrations of carbon dioxide in dwellings usually increase, especially in bedrooms. Even though you are getting enough hours of sleep, you can feel tired and irritable when you wake up in the morning.

**UNI@FRESH** air cleaners are the only ones on the market which remove carbon dioxide from interior air. They also filter out other threats to your family's health such as dust and pet dander, pollen, fungal spores and other microscopic particles.

People now spend the majority of their time indoors. The patented **UNI@FRESH** air-filtration system is well worth investigating.

DESIGN by **Harri Koskinen**

# UNI@FRESH

*Patented and effective air filtration!*

**UNI@FRESH air cleaners get to work when they are needed most. They extract carbon dioxide from indoor air when people are occupying a room, returning it when the room is empty so that it can be removed by normal ventilation.**

## Three types of filter – clean indoor air

This unique patented solution continuously cycles interior air through a 3-stage filtration system:

- 1** a combination activated-carbon filter removes dust and pet dander, pollen and unpleasant smells
- 2** a HEPA filter removes microscopic particles and fungal spores
- 3** the carbon dioxide filter cassette removes excess carbon dioxide

The result is clean, fresh indoor air which keeps you healthy - and helps you feel good.

## Easy to maintain

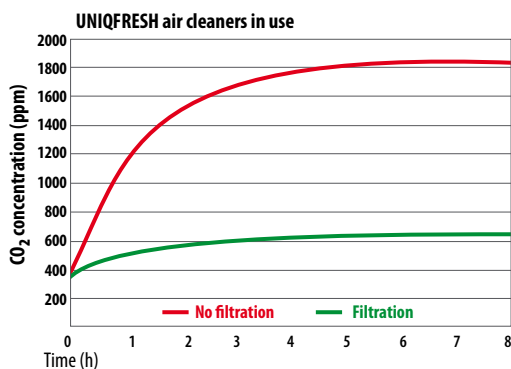

UNI@FRESH air cleaners are ready to use. The only maintenance required is changing of the activated-carbon filter every six months, and replacement of the HEPA filter every five years. In normal use, the carbon dioxide filter cassette has a lifetime of at least 15 years.

While air cleaners are particularly necessary in bedrooms, they can be located in any indoor space. Designed by **Harri Koskinen**, the clean lines of UNI@FRESH blend easily with other interior furnishings as it quietly gets on with the task of cleaning the air you breathe.

Two models are available: the UNI@FRESH 100 and the UNI@FRESH 400. Both feature the same timeless design, making them suitable for all interior spaces.

UNI@FRESH air cleaners are fitted with castors, so they can easily be wheeled from room to room.
